6. PBS INFORMATION

Breast milk is best for babies. Professional advice should be followed before using an infant formula. Introducing partial bottle-feeding could negatively affect breast feeding. Good maternal nutrition is important for breast-feeding and reversing a decision not to breast-feed may be difficult. Infant formula should be used as directed. Proper use of infant formula is important to the health of the infant. Social and financial implications should be considered when selecting a method of feeding.

RCF® PBS INFORMATION: Soy Protein and Fat Formula with Vitamins and Minerals, Carbohydrate Free. Ketogenic diet treatment for patients with intractable seizures or glucose transport protein defect or pyruvate dehydrogenase deficiency. Glucose galactose intolerance and multiple monosaccharide intolerance in infants and children. Restricted Benefit.

RCF® 8577K. See PBS Schedule for full criteria.
