MoliCare Skintegritiy System

Back to *Balance*

“

At first it felt like I had lost control of my life.

After being introduced to the MoliCare range my world turned around. I felt like I was gifted with a second chance.

With my confidence renewed I started doing all the things that I thought I was going to miss out on, and without the irritations the simple things became more enjoyable too.

My friends have begun to ask what has given me back my spark, little did they know that Molicare has given me my life back.

If you know someone suffering from leaks and retreating from life, recommend they try the MoliCare range, it changed my life.

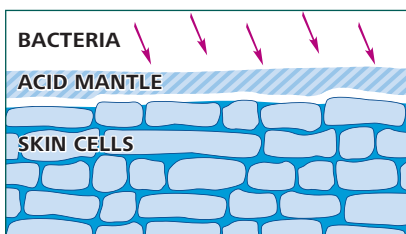

”

Clair

Defending Against Incontinence Associated Dermatitis

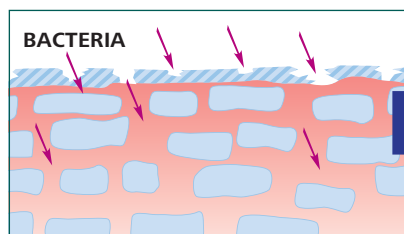

Acid Mantle A Barrier to the Outside World

Healthy Acid Mantle pH 4.5 - 5.5

- Healthy skin has a slightly acidic value of pH 4.5 to 5.5
- The acid mantle is an acidic film on the surface of healthy skin that acts as a barrier to bacteria, fungi and other infections.

Weakened Acid Mantle Elevated pH

- Skin pH naturally increases with age (up to 6.0)¹
- Urine, faecal matter and perspiration may increase skin pH up to pH 8.0.
- Elevated pH is associated with a breakdown of the acid mantle, allowing bacteria to penetrate skin cells and cause IAD.
- Maceration and friction result in excoriation, infection and other complications.

IAD

- IAD is an inflammation of the skin due to chronic incontinence and may be accompanied by redness, blistering, erosion and secondary infection.

IAD accompanied by unrelieved pressure results in a **5-fold increase** in pressure injury risk²

The average cost to treat one mild to moderate IAD episode in one resident is \$169 USD.
IAD occurrence can be up to 52% resulting in costs of \$2,535 USD per month.

(Assumes 20% in a 100 long term care facility with 75% incontinence)³

Absorbent

Skin
Care

The MoliCare Skintegrity

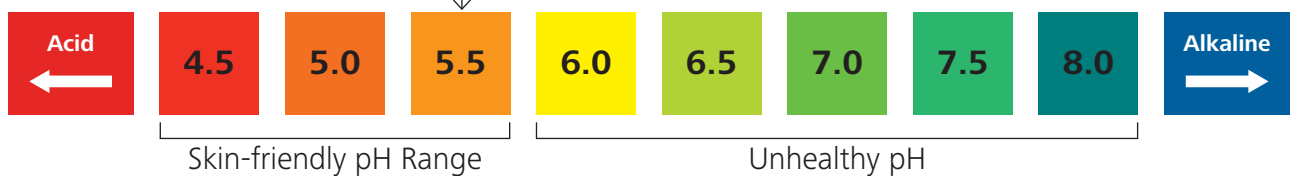

Absorbent
Products

MoliCare with Curly Fibre Curly Fibre Helps Maintain a Healthy Skin Environment

- **Buffers** urine to a skin-friendly pH
- **Maintains** a skin-healthy pH 5.5 value
- **Preserves** the acid mantle
- **Facilitates** rapid fluid distribution within the brief

Absorbent products with **curly fibre significantly lower skin pH and reduce the risk of Incontinence Associated Dermatitis⁴**

MoliCare Advanced Features

Patented Curly Fibre Technology

Maintains the skin at a healthy pH and preserves the acid mantle to help prevent, reduce the severity and promote healing of IAD.

3-layer Absorbent Core & Quick Dry System

Guides fluid quickly into the centre, locking both urine and odour safely inside. Leaving dry skin for comfort and reduced risk of IAD.

Anti Leakage System

Inner cuffs ensure maximum protection maintaining wearer dignity and limiting laundry changes.

Skin
Care

MoliCare Skin

Clean

Limits chemical stress of frequent washing – thorough but mild cleansing.

Protect

Counteracts the effects of voids on the skin.

Care

Meets the need for extra moisture and lipids.

Superabsorbent Polymers

Reduce ammonia formation and neutralise odours.

Air Active Side Panels

Increase air permeability to promote a healthier skin environment which serves to reduce IAD and lesion-causing moisture.

Wetness Indicator

Takes the guess work out of changing by providing an accurate wetness indicator.

Dermatologically Tested

Hypoallergenic, even on sensitive, atopic skin.
Reducing the chances of allergic reactions and rashes.

The MoliCare Range

Absorbency Guide

 **Light Incontinence**
Drips & dribbles eg: up to ½ or 1 cup

 **Very Heavy Incontinence**
Complete bladder loss eg: over 2 cups

 **Moderate to Heavy Incontinence**
More than a dribble but not complete loss of control eg: up to 2 cups

 **Severe to Very Severe Incontinence**
Complete bladder loss of a very severe nature. Often requiring extra absorbency and protection.

Jeff's Story

In March 2015 at age 45, I was diagnosed with prostate cancer. My treatment involved robotic surgery and after a stay in hospital I was sent home with a catheter.

My surgeon suggested that I bring a pad with me for the follow up session to remove the catheter. Following his recommendation I bought a well-known pull-up from the supermarket.

Upon removal of the catheter I found myself immediately incontinent, the pad didn't hold at all and I was soaked through including my pants. The surgeon had no standby stock and all he could give me was a bluey to sit on in the car. My journey home was around 45 minutes and the whole time I was totally soaked and leaking more.

We had been warned to expect incontinence and dribbling, I never thought it would be like this.

“I felt so let down by my surgeon for not being prepared.”

The pull-ups I bought initially always felt uncomfortable, often with a wet feeling and frequently having to change them, which was frustrating as I had to fully undress every time.

“One day I went to watch my son play a game of football but I needed to change in the public toilets which was embarrassing and difficult.”

I explained my troubles to a friend who is a nurse, I described how I hated the wet feeling and had resorted to using tissues constantly to dab dry. My friend recommended HARTMANN pads and organised samples in different styles and absorbencies to see which suited me best. My friend also recommended a continence nurse and physio.

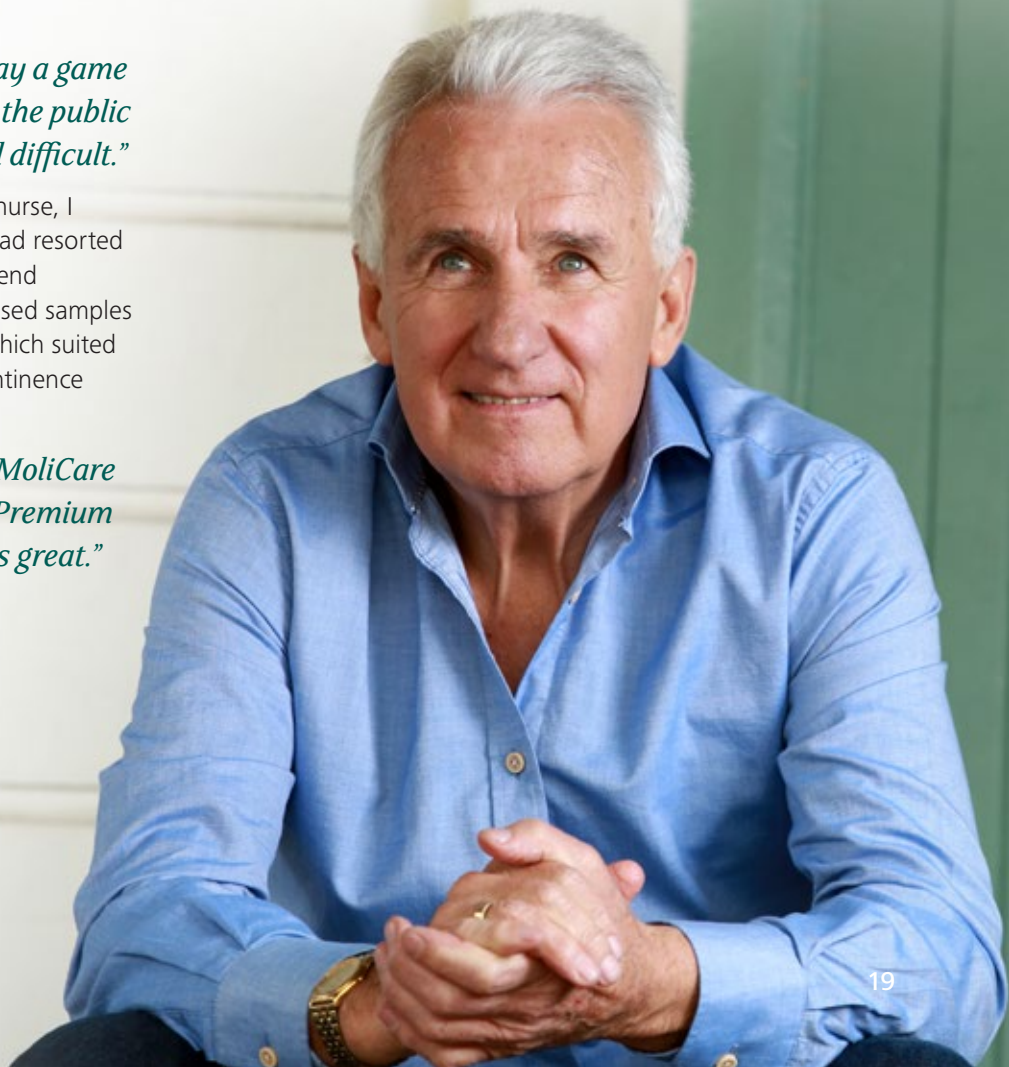

“I tried them all and settled on the MoliCare Premium Fixpants with MoliCare Premium Form for Men. This combination is great.”

After a few weeks of starting physio, I was able to step down to the MoliMed for Men Protect in my MoliCare Premium Fixpants. I even prefer these over normal underwear as they are softer and more comfortable. Not only is this combination more comfortable, but I am able to be easily and discreetly change as I need to. *“Because of the incontinence I was too embarrassed to go back to work...”*

but then I started going for a few hours a day and I felt great! I feel like this is life changing for me.

I still have to be careful when I go out drinking with my mates. A few beers in can make me leak, but I know that I can rely on MoliCare pads.

If there is something I could change, I would like the surgeons to know about HARTMANN pads and for them to be prepared with a proper list of medical suppliers, instead of sending me to a supermarket. Also having product on standby in their rooms and even trial packs for me or others to use.

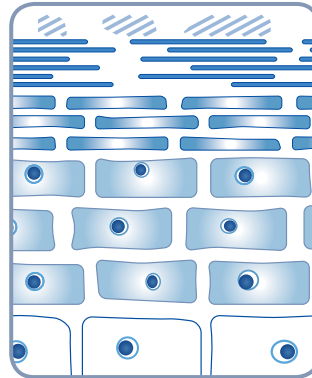

Skin Care - Clean

MoliCare Skin clean products:

- Clean skin thoroughly with a pH 5.5 skin-balanced formula
- Help to preserve the acid protection mantle of the skin that acts as a barrier to infections
- Minimise detergent use to help prevent detergent related skin stress

Only pH skin-balance mild cleansing substances to assist in immediate regeneration of the acid protection mantle.

Natural almond oil and moisturising panthenol to replenish lipids (mortar)

Dermatologically tested products for proven skin-friendliness

Skin Cleansing Foam

- Water-free cleansing
- Suitable for faecal incontinence
- No water required
- Odour neutralising
- pH 5.5 to maintain the skin's acid mantle and natural protection layer
- Creatine to support the skin's natural barrier function
- Refreshing scent with patented odour neutraliser

ON CONTRACT

SKIN CLEANSING FOAM	CODE	CONTRACT CODE	SIZE	PACKAGING

Skin Care - Protect

MoliCare Skin protect products:

- Contain the Nutriskin Protection Complex with natural essential fatty acids, amino acids, creatine and almond oil to strengthen the skin's barrier and regeneration function
- Support Active Skin Protection features of HARTMANN continence products and are suitable for use with continence pads without reducing their absorbency
- Nourish and protect the skin and its natural barrier functions from the detrimental effects of urine and faeces

- Replenishment of moisturising substances on the skin surface
- Support for the synthesis of new lipids (mortar)
- Enhancement of the production of new skin cells (bricks)
- Reproduction of the acid protection mantle

Barrier Cream

- Protects irritated skin in the genital area from harmful substances
- pH 5.5 to maintain the skin's acid mantle and natural protection layer
- Contains the Nutriskin Protection Complex to strengthen the skin's barrier and regeneration function
- Zinc oxide-free
- Forms a transparent protective layer
- Water-in-oil-in-water emulsion which supplies essential oils immediately to the skin

ON CONTRACT

BARRIER CREAM	CODE	CONTRACT CODE	SIZE	PACKAGING
	995 086		200 ml	12
	995 051		10 ml	100

Skin Protection Foam

- Forms a transparent film while conditioning and allowing the skin to breathe
- Contains the Nutriskin Protection Complex to strengthen the skin's barrier and regeneration function
- Very low viscosity and easy to spread
- Incorporates nourishing panthenol and urea to stimulate skin regeneration and maintain the skin's moisture balance

ON CONTRACT

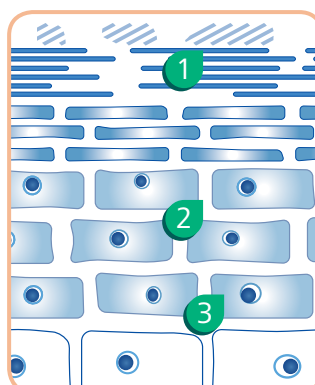

SKIN PROTECTION FOAM	CODE	CONTRACT CODE	SIZE	PACKAGING
	995 087		100 ml	12

Skin Care - Care

MoliCare Skin care products:

- Contain creatine to stimulate the energy metabolism of the skin and to reinforce its natural protection functions
- Water in oil emulsion for a long lasting moisturising effect to prevent dry skin

- 1 Rich water-in-oil emulsions provide the skin with moisture and lipids for more skin elasticity
- 2 Natural almond oil and moisturising panthenol cause the substitution of lipids (mortar)
- 3 The Nutriskin Protection Complex nourishes and protects the skin intensively

Supporting Products

Body Lotion

- Intensive care for sensitive elderly skin
- Contains the Nutriskin Protection Complex for strengthening the skin's barrier and regeneration function
