Going further for health

Our mission is to go further for health by supporting healthcare professionals in their daily work and also bringing that expertise into the home.

We develop products and solutions that sustainably improve the quality of medical treatments and offer added value to healthcare professionals – not only through easier applications but also through positive economic benefits.

We are taking care of what matters by:

- **providing optimal leakage protection and maintaining healthy skin** to enable those living with incontinence to get on with their life.
- **focusing on the professional carer and their needs** to improve their daily work.
- using proven technology to fulfil the highest demands in **quality, reliability and efficacy**.
- **developing future-minded solutions that provide healthcare professionals** with tools which meet their needs.

HARTMANN has been producing continence products since 1974 and we are a leading manufacturer of adult continence products worldwide. In a category which was and still is surrounded by social taboos, we have continuously created innovative products and services to cover the consumers' and healthcare professionals' needs.

Using extensive research, we find holistic solutions that meet individuals' practical demands, as well as giving them emotional confidence and a secure feeling through our products.

Why MoliCare?

MoliCare incontinence products provide optimal leakage protection and maintain healthy skin.

Since 1997 MoliCare products not only absorb urine and capture faeces to prevent leakage, but also actively protect the affected skin.

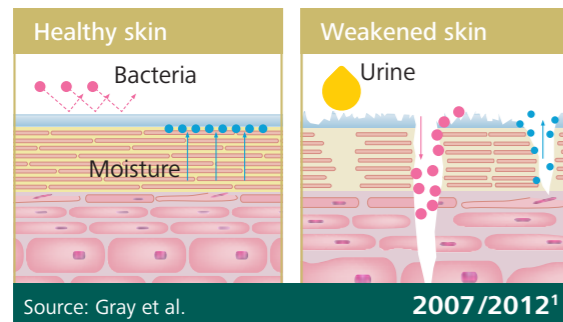

“After being introduced to the MoliCare range my world turned around.

With my confidence renewed I started doing all the things that I thought I was going to miss out on, and without the irritations the simple things became more enjoyable too.

Clare”

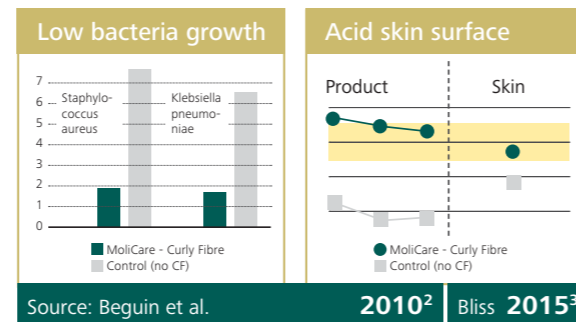

Scientific proof

Healthy acid protection mantle reduces the prevalence of IAD

- A healthy acid protection mantle works as barrier of the skin and inherits the risk of skin colonisation by bacteria.
- Urine increases the pH level of skin, damaging the acid protection mantle and thus promoting irritation.

- Absorbent briefs containing Curly Fibre have potential to prevent IAD, by showing significantly lower skin pH values, compared to standard briefs, when skin is exposed to alkaline urine.
- Curly fibre inhibits the growth of pathogenic bacteria.

By numbers: IAD & Pressure Injuries

Incidence

In an acute care study of 5,432 patients:⁴

- **45.7% of patients had a prevalence of IAD**
- **73% of IAD patients developed IAD following admission.**

IAD accompanied by unrelieved pressure results in a **5-fold increase** in pressure injury risk⁵

Cost

IAD⁶

The average cost to treat one mild to moderate IAD episode in one resident is \$220.

IAD occurrence can be up to 52% resulting in costs of \$3,294 per month.

(This example assumes 20% in a 100 bed long term care facility with 75% incontinence at April 2018 rate)⁶

Pressure Injuries⁷

Stage I	\$2,746	(up to 28 days to heal)
Stage II	\$10,347	(up to 92 days to heal)
Stage III	\$17,441	(up to 127 days to heal)
Stage IV	\$22,446	(up to 255 days to heal)

MoliCare Skintegrity System

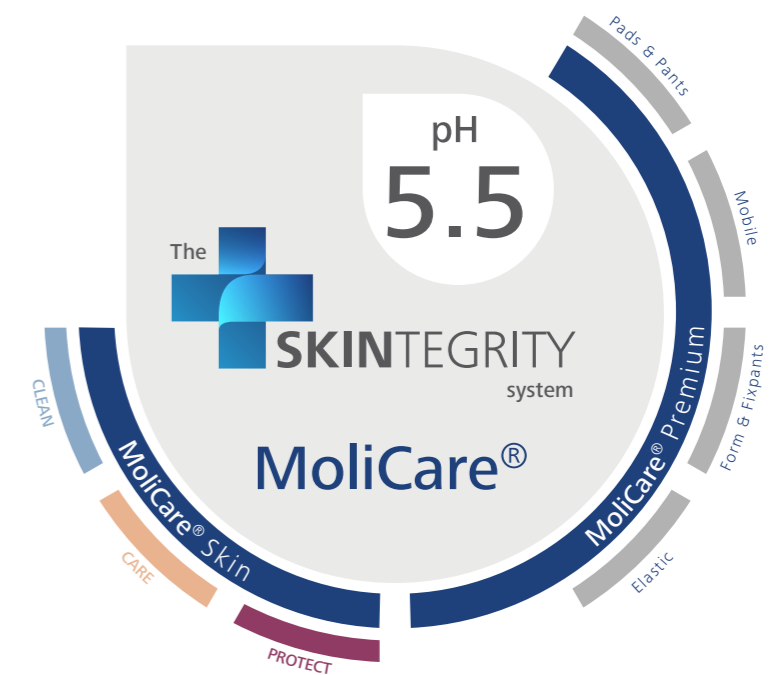

What is the MoliCare Skintegrity System?

The MoliCare Skintegrity System promotes holistic incontinence management and IAD prevention. Through the combination of the MoliCare absorbent product range and MoliCare Skin products, Skintegrity continues to improve the quality of life of people living with incontinence.

Through Curly Fibre technology, a skin-neutral pH value of 5.5 is achieved in all MoliCare absorbent products.*

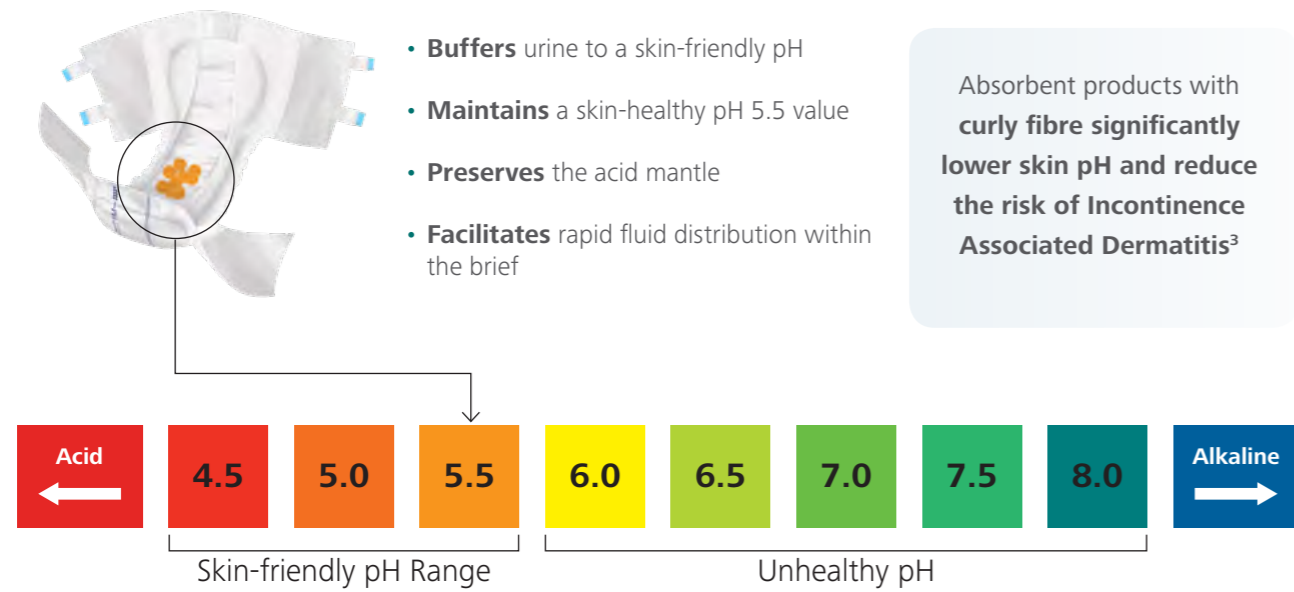

The MoliCare Skin product range complements this with products maintaining the acid mantle of the skin through a skin-neutral pH level of 5.5.**

* Except MoliCare Premium MEN 3 drops
** Except body lotion, hand cream, protection foam

MoliCare Premium

With Curly Fibre helps maintain a healthy skin environment

MoliCare Skin

With Nutriskin Protection Complex helps nourish and rebuild the acid mantle.

CLEAN

MoliCare Clean products with a pH 5.5 skin balanced formula which helps to preserve the protective acid mantle.

PROTECT

MoliCare Protect contains the Nutriskin Protection Complex with natural essential fatty acids, amino acids, creatine and almond oil to strengthen and regenerate the skin's barrier.

CARE

MoliCare Care products contain creatine to stimulate the energy metabolism of the skin and reinforce its natural protection.

Absorbent Product Features

Active skin protection
Skin friendly due to pH value of 5.5.

3-layer absorbent core and Quick Dry System
Guides fluid quickly into the centre, locking both urine and odour safely inside. Leaving dry skin for comfort and reduced risk of IAD.

Patented Curly Fibre Technology
Maintains the skin at a healthy pH and preserves the acid mantle to help prevent, reduce the severity of, and promote healing of IAD.

Hypoallergenic and dermatologically tested
The materials used have an extremely low potential to trigger allergic reactions.

Anti Leakage System
Inner cuffs ensure maximum protection maintaining wearer dignity and limiting laundry changes.

Odour Neutraliser
Superabsorbent polymers reduce ammonia formation and reduces odours.

Ergonomic Use
Approximately 20% faster application as well as an easier and more ergonomic handling for caregivers.***

Elasticated Side Panels
Elasticated side panels in the hip area ensure better adaptation to the body's shape and movement, delivering improved comfort for the wearer.

Skin Care Features

MoliCare Skin is a complete cleanse, protect and care solution for compromised and mature skin. The range complements absorbent incontinence products to prevent skin irritations.

- pH skin-neutral clean, care and protection products with a **pH value of 5.5**.**
- Highest quality of ingredients with **Nutriskin Protection Complex**.†
- **Odour neutraliser**.††
- **No clogging** of absorbent incontinence products.‡
- **Convenient handling** due to user-friendly packaging design.

Nutriskin Protection Complex
A composition of rich ingredients with amino acids, sweet almond oil, essential unsaturated fatty acids and creatine which strengthen the barrier function of the skin

Active Skin Protection
Preserves the acid mantle to help prevent, to reduce the severity of, and to promote healing of IAD.

Dermatologically tested
Hypoallergenic, even on sensitive, atopic skin. Reducing the chances of allergic reactions and rashes.

*** The reduction from 4 to 2 tapes (one for each side) combined with no side panels in the front, simplifies the application, by reducing the application steps from 8 to 4 compared to a traditional slip with 4 side panels and 4 tapes. Additionally, due to the elasticated side panels, there is no need of readjusting the tapes.
 ** Except body lotion, barrier cream, protection foam
 † Only in body lotion, barrier cream, protection foam
 †† Except moist skin care tissues, impregnated wash gloves and protection foam
 ‡ Only for barrier cream

Jeff's story

In March 2015 at age 45, I was diagnosed with prostate cancer. My treatment involved robotic surgery and after a stay in hospital I was sent home with a catheter.

My surgeon suggested that I bring a pad with me for the follow up session to remove the catheter. Following his recommendation I bought a well-known pull-up from the supermarket.

Upon removal of the catheter I found myself immediately incontinent, the pad didn't hold at all and I was soaked through including my pants.

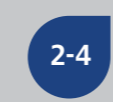

The pull-ups I bought initially always felt uncomfortable, often with a wet feeling and frequently having to change them, which was frustrating as I had to fully undress every time.

"One day I went to watch my son play a game of football but I needed to change in the public toilets which was embarrassing and difficult."

I explained my troubles to a friend who is a nurse, I described how I hated the wet feeling and had resorted to using tissues constantly to dab dry. My friend recommended HARTMANN pads and organised samples in different styles and absorbencies to see which suited me best.

"I tried them all and settled on the MoliCare Premium Fixpants with MoliCare Premium Form for Men. This combination is great."

After a few weeks of starting physio, I was able to step down to the MoliMed for Men Protect in my MoliCare Premium Fixpants. I even prefer these over normal underwear as they are softer and more comfortable. Not only is this combination more comfortable, but I am able to be easily and discreetly change as I need to.

Underpads

Disposable cellulose fluff underpants

MoliNea Underpads

Disposable underpads with cellulose fluff containing absorbent core and waterproof polyethylene backsheet offer reliable bed protection. Suitable for use as direct incontinence underpad or as additional bed protection when absorbent incontinence products are being used.

- Core made of **soft cellulose fluff** for fast absorption.
- Waterproof and non-slip foil backsheet for **high leakage protection**.
- **Stay-dry** non-woven top layer covers the entire surface including the foil edges, sealed from edge to edge.
- **Pre-folded** for simple use and storage.
- Suitable for bed, chair, furniture and other surface protection.

Skin Care - Protect

Skin balanced

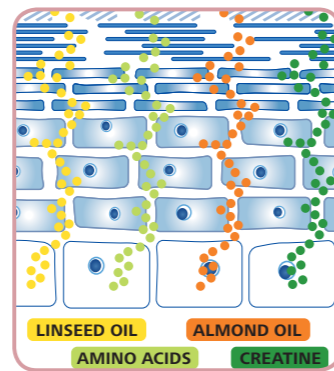

Dermatologically tested

Nutriskin Protection Complex*

MoliCare Skin protect products:

- Contain the Nutriskin Protection Complex with natural essential fatty acids, amino acids, creatine and almond oil to strengthen the skin's barrier and regeneration function
- Support Active Skin Protection features of HARTMANN continence products and are suitable for use with continence pads without reducing their absorbency
- Nourish and protect the skin and its natural barrier functions from the detrimental effects of urine and faeces

- Replenishment of moisturising substances on the skin surface
- Support for the synthesis of new lipids (mortar)
- Enhancement of the production of new skin cells (bricks)
- Reproduction of the acid protection mantle

Barrier Cream

- Protects irritated skin in the genital area from harmful substances
- pH 5.5 to maintain the skin's acid mantle and natural protection layer
- Contains the Nutriskin Protection Complex to strengthen the skin's barrier and regeneration function
- Zinc oxide-free
- Forms a transparent protective layer
- Water-in-oil-in-water emulsion which supplies essential oils immediately to the skin
