

SALLYSOCK

Minimise slipping on hard floors

SallySocks are non-slip patient socks, designed to minimise the chance of slipping on dry floors. Made from polyester and spandex with skid resistant grips on the base, available in 6 sizes: X-Small, Small, Medium, Large, X-Large and Bariatric.

FEATURES

- Comfortable for patients designed to avoid twisting and bunching experienced with ill-fitting or poor quality non-slip socks
- Loose ankle opening to assist with blood circulation around the ankle
- Heal to toe slip-resistant grips so the entire foot is covered
- Single patient use
- Different colour grips to identify sock size
- Latex free
